

**CENTURY** is able to competitively manufacture specialised requirements such as small runs and niche products through to high volume production.

The press shop capabilities include:

- High-volume coil fed systems
- Manual pick and place operations
- An electric induction furnace to hot form parts
- Spot welding
- Threading

We are also a quality accredited company, so you can rest assured that any work completed at Century is overseen by a team of qualified Managers, Engineers and Production Staff.
