

STAMINALIFT

INDUSTRIAL SERIES

REDUCES INJURY & FATIGUE CAUSED BY PUSHING & PULLING HEAVY ITEMS

StaminaLift is an innovative electric unit that is ergonomically designed to reduce strain and injury caused by manually pushing and pulling heavy items.

With the use of StaminaLift heavy items can be moved quickly and effortlessly resulting in improved labour efficiency.

A patented lift, grip and lock mechanism ensures safe and secure locking to the item or customised attachments can be designed to suit various applications.

MAJOR BENEFITS

- Reduces injury
- Increases labour efficiency
- Reduces reliance on forklifts
- Quiet operation / no fumes
- Manoeuvrable in small areas
- Cost effective materials handling
- Long life quick charging batteries

Forward, reverse, turning and lifting arm operated by one joystick

Speed settings can be customised for personal use and safety regulations

Custom attachments for various applications
